DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a fuel cell gas diffusion layer, classified in class 429, subclass 39.
 - II. Claims 13-30, drawn to a method of making a gas diffusion layer, classified in class 429, subclass 13.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make another and materially different product. The method of making a fuel cell gas diffusion layer can be used to make a gas diffusion layer comprising a carbon fiber layer, a fluoropolymer layer that is less than 5 microns, and a hydrophilic layer that is no more than 1 micron.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1745

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

In addition, further restriction is required within Group II:

This application contains claims directed to the following patentably distinct species:

Species II(a): plasma: oxygen

Species II(b): plasma: nitrogen

Species II(c): plasma: nitrogen dioxide

Species II(d): plasma: nitrous oxide

Species II(e): plasma: ammonia

Species II(f): plasma: sulfur dioxide

Species II(g): plasma: silanes

Species II(h): plasma: siloxanes

Species II(i): plasma: organometallics

The species are independent or distinct because they are materially different elements and compounds.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 13 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1745

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
